**Time:** Summer 2008

**Location:** Palo Alto

**Department:** SAP NetWeaver Prototyping and Advanced Development

*Internships are an important career development tool among students, and are an effective means to develop functional skills, strengthen resumes and nurture industry contacts. SAP has a commitment to the internship program, providing quality projects to students.*

## **Job Title & Location**

Software Development Intern – Palo Alto

## **Contact**

David Elliston: [david.elliston@sap.com](mailto:david.elliston@sap.com)

## **Project Description**

The SAP NetWeaver Prototyping and Advanced Development Team supports innovation in NetWeaver, SAP's technology platform. The team focuses on generating innovative ideas and creating cutting-edge prototypes.

The interns we hire will have the opportunity to work on novel and innovative ideas and trends. Activities the intern engages in range from incubation and mockup creation to code development for proof-of-concept studies.

The decision about the specific topic the intern will be working on is based on experience, available opportunities and the interests of the candidate.
